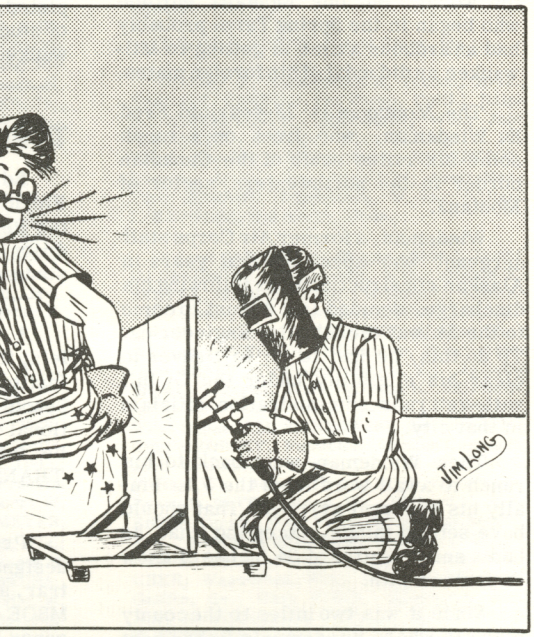
HEIR CONDITIONING

Mr. Leo B. Doyle, laboratory instructor in electricity, announced that there has been an addition to his family, Barbara Jean, who weighed six pounds eight ounces upon arrival May 1. Barbara Jean has a brother, Gary, 3.

John McSorley, '41, of Portage, Wisconsin, sends the following news:

"We are the proud parents of a new son, Thomas John. I haven't spoken to him about this yet, but undoubtedly he will want to be enroled at MSOE in the class of 1968. From all appearances he looks like an engineer."

Two members of the staff, Mrs. Mary Lou Casey and Mrs. Alice Cassaro, recently left MSOE to take over the duties of raising a family. Their friends gave them appropriate gifts and wished them success in their new occupations.



MSOE QUINTET

The MSOE Quintet entertained at the "Meet Your President" party of the Milwaukee section of the American Institute of Electrical Engineers, May 6, at the Engineers' Society of Milwaukee building. James F. Fairman, national president of AIEE, was introduced to members and their guests. Other features of the evening's program were dancing, cards, and movies; a solo was sung by John Yoder.

The Quintet consists of (top to bottom, right) Bill Bonney, John Yoder, Ed Weaver, Carmine Masters, and Adi Khambata. These men have on past occasions served at school functions such as Homecoming, the St. Pat's festivities, and many others. They urge those interested in singing to join, especially since several of the present members will be leaving at the end of the Spring Term. Regular practice sessions are held once a week.

STATIC

'Improvement' seems to be the constant watch word in the shack of the MSOE Amateur Radio Club. Newest addition is a broadcast style console, which is in the last stages of completion. The console will bring all transmitting and receiving controls right to the fingertips of operators of W9HHX, as well as dress up the shack.

Among other developments of recent note is the conversion of a surplus SCR-522 VHF receiver by Emil Rossdeutcher. This will enable the club to listen to two meter (144 meg.) stations. Mike Holland, W9HYR, is working on a ten meter (28 to 30 meg.) transmitter and has completed converting a surplus receiver for club use.

"Net Procedure" was the subject of an interesting talk given by Lester Peterson, W9YCV, at a meeting of the MSOE Amateur Radio Club, held April 21. A movie, "Curiosity Shop," was also shown.

A high frequency demonstration of 420 MC amateur equipment was given by Elton Stolberg, W9IWT; Jim Ingram, W9HWV; and Mike Holland, W9HYR. Elton Stolberg explained the equipment to other hams at the meeting.

PHALANX PLANS SPRING DANCE

Phalanx alumni and friends were special guests at a smoker for prospective members, April 27, at the Swiss Club.

Plans for the third annual Spring Dance were announced, and committees organized to carry them out at the fraternity's April business meeting.

The Phalanx Softball team was reorganized, and Kenny Foster was elected manager for this season.
